ABOUT ME

Detail-oriented IT professional with expertise in web development projects. Proficient in **React**, **Typescript**, with a strong track record of optimizing IT web application and delivering reliable technical solutions. Collaborative team member with excellent problem-solving and communication skills, committed to driving organizational success through technology.

PROFESSIONNAL EXPERIENCE

Wefox, Barcelona, Spain

Web developer | Jan 2023 – Jul 2024 (1 year 7 months)

Development of an insurance web app that allows the creation of insurance products from scratch. The goal is to simplify and expedite the launch of new insurance policies, which currently takes a long time due to the lack of digitalization.

Stack:
- **TypeScript with React.js**
- **React Query**: For performing **API** calls.
- **MSW** (Mock Service Worker): To **mock API** calls and ensure autonomy from the backend during development.
- **Testing**:
  - Unit tests with **Jest**.
  - Integration tests with **Playwright**.
- **Storybook**: For managing components, as used by Wefox.

Workflow:
- **Agile methodology**: In **Scrum**, utilizing **JIRA** for task management.
- **Functional refinement**: Held twice a week to communicate with the Product Owner about new **User Stories** to develop.
- **Technical refinement:** Conducted immediately after functional refinement to review new features from a technical perspective, and set **story points** for estimating the difficulty.
- **Code versioning**: With **Github**, pulling an existing feature to review code or create branch from scratch.
- **Release**: Update version numbers and release notes and deploy it to staging.
- **Adaptability**: Capable of adapting to various features and requirements.

Safran, Paris, France

Web developer | Mar 2021– Dec 2022 (1 year 9 months)

- Development of **web apps/components** in **Storybook** using **ES6** and the **React.js** library within a **Node.js** environment.
- Creation of **unit tests** for web apps/components using Testing Library/React in a **Jest** environment.
- Development of **APIs** in **Python** within a **Django** environment connected to an online **PostgreSQL** database.
- Development of add-ons in the **Node.js** environment, utilizing a **Restify.js** server to create local **APIs** and the **fs** command.
- Creation of CLI tools to automate certain processes using the **Commander.js** library.
- All work conducted using **Agile** methodology.
